Field Experiences: Preparing the Next Generation of Teachers

Brenda Blackburn, Blue Ridge Community College, Sharon Little, South Piedmont Community College, Tracey West, SCRIPT-NC, UNC

October 2, 2014
Welcome and Introductions
Agenda

• NAEYC guidance on field experiences
• Finding quality sites for field experiences
• Identifying and supporting mentor teachers
• Supporting student teachers
• Criteria and guidance for student teaching or practica
• Evaluating Field Experiences
• Discussions/Activities:
  • Locating quality field experience sites: Challenges and strategies
  • Mentor teachers and student teaching feedback
  • Student teaching/practica experiences
Field Experiences

- Internship
- Practicum
- Lab
- Observation
- Clinical Experiences
- Student Teaching
Familiar Challenges

- Finding quality placement sites
- Finding qualified cooperating/mentor teachers
- Meeting the needs of working students
- Finding sites that reflect cultural, linguistic, and/or ability diversity
- Addressing the disconnect between the “real” and “ideal” in early childhood classrooms; what students learn and what they see
2010 NAEYC Standards for Initial & Advanced Early Childhood Professional Preparation Programs

For use by Associate, Baccalaureate and Graduate Degree Programs
What is NAEYC Standard 7?
**STANDARD 7. EARLY CHILDHOOD FIELD EXPERIENCES = Assoc. Criterion 5**

Field experiences and clinical practice are planned and sequenced so that candidates develop the knowledge, skills and professional dispositions necessary to promote the development and learning of young children across the entire developmental period of early childhood – in at least two of the three early childhood age groups (birth – age 3, 3 through 5, 5 through 8 years) and in the variety of settings that offer early education (early school grades, child care centers and homes, Head Start programs).

**Key elements of Standard 7**

7a. Opportunities to observe and practice in at least two of the three early childhood age groups (birth – age 3, 3-5, 5-8)

7b. Opportunities to observe and practice in at least two of the three main types of early education settings (early school grades, child care centers and homes, Head Start programs)
Criterion 5: Quality of Field Experiences

• The program’s field experiences support candidates’ learning in relation to the NAEYC standards.

• Rationale: Candidates will understand and apply the competencies reflected in the NAEYC standards when they are able to observe, implement, and receive constructive feedback in real-life settings.
Indicators of strength:

- Field experiences are consistent with outcomes emphasized in NAEYC’s standards, are well planned and sequenced, and allow candidates to integrate theory, research, and practice.
- When the settings used for field experiences do not reflect standards of quality, candidates are provided with other models and/or experiences to ensure that they are learning to work with young children and families in ways consistent with the NAEYC standards.
Indicators of strength: (continued)

Faculty and other supervisors help candidates to make meaning of their experiences in early childhood settings and to evaluate those experiences against standards of quality.

- Adults who mentor and supervise candidates provide positive models of early childhood practice consistent with NAEYC’s standards.

- Field experiences expose candidates to a variety of cultural, linguistic, and ethnic settings for early childhood care and education.

- Field experiences provide opportunities for candidates to observe and practice in at least two of the three early childhood groups (birth-age 3, 3-5, 5-8) and in at least two of the three main types of early education settings (early school grades, child care centers and homes, Head Start programs).
Excerpt from NAEYC Early Childhood Associate Degree Accreditation Handbook  (Page 79)

Field Experiences and clinical practice:
Includes field observations, field work, practica, candidate teaching and other “clinical” practice experiences such as home visiting. A planned sequence of these experiences supports candidate development of understanding, competence and dispositions in a specialized area of practice.

Excerpt from Self-Study Report template for first-time accreditation  (Page 20)

**Sources of evidence:**
1) Report:
   - a one- to two-page description of program’s approach to using field experiences.
   - program chart of field experiences (see example below)
   - a one-page description of plans to address challenges and build on current strengths in this area.
2) Site Visit: Interviews with faculty, candidates, cooperating teachers, and other supervisors

In planning field experiences do you take into account . . .

- **Type of program** (e.g., child care, PreK, Head Start)?
- **Children served** (e.g., cultural, linguistic, and ability diversity)?
- **What you want students to learn** (e.g., knowledge, skill, dispositions)?
- **How the field experience will mesh with the course experience?**
93% of programs preparing early childhood teachers do not require a student teaching experience in a setting they describe as ‘diverse’, ‘multicultural’ or in some other way that suggests the program expects the student teacher will gain experience with children of color, second language learners, children from many cultures and ethnicities, and immigrant, poor and special needs children.

from Ray, Bowman, & Robbin
Finding

Offering students the opportunity to experience diverse field placements within a supportive context has been shown to expand their thinking about teaching and learning and to push them to develop their own sense of themselves as early childhood teachers.

Anecdotal Evidence

• High quality field experience sites are hard to find
• High quality inclusive field experience sites are even harder to find

from Camille’s conversations with faculty across the country
Practicum Placement Tips

• Who are your stakeholders? Review your advisory committee for relevant practicum placements.

• Attend local child care director meetings, conferences, trainings to network with potential partners for practicum experiences.

• Engage in conversations with your local regulatory consultant for insight on quality environments.

• Contact students prior to the beginning date of class to discuss their schedules and provide workable solutions.
Practicum Placement Tips

• Think out of the box! Is there Saturday care, second shift care, or family child care homes that would offer the flexibility to meet the needs of the students?
• Does your local school system have Pre-K classrooms? Connect with your exceptional children’s program for ability diverse learning experiences for your students!
• Splitting practicum hours is doable—again, think of creative ways to work with students!
Discussion

Finding Quality Field Experience Sites: Challenges and Strategies
Finding

Institutions lack clear, rigorous criteria for the selection of cooperating teachers – either on paper or in practice.

from Student Teaching in the US
Expectations for Mentoring or Cooperating Teachers

- Site expectations/criteria
- Mentoring/Cooperating Teacher degree expectations
- Site/Mentoring/Cooperating Teacher Responsibilities
- Provide handbook to Mentoring/Cooperating Teacher
- Provide a checklist for the Mentoring/Cooperating Teacher

- See handouts
Finding

Institutions do not take advantage of important opportunities to provide guidance and feedback to student teachers.

from *Student Teaching in the US*
Key Ingredients for a Strong Student Experience

• Set a vision for strong and positive outcomes
• Institute high standards for student participation and placement
• Provide guidance and evaluation to students
• Gather feedback on student placements

from Student Teaching in the US
Guidance for field experiences

- Provide clear expectations to our students
- Provide observation etiquette guidelines
- Provide interview guidelines
- Provide permission forms for parents, if needed
- Provide forms for feedback on placement sites and experiences

(see handouts)
Criteria and guidance for student teaching or practica

• New guidelines for EDU 284/285
• 160 Hours
• Coded as Student Teaching
Discussion Questions:

1. How do you identify, support, and provide guidance to mentor or supervising teachers?

2. How do you provide feedback to your student teachers?
Recommendation

Require prospective teachers to be assessed using valid and reliable tools, provide those teachers with access to assessment results and videos of their practice, and provide research-based strategies for improvement using those assessments (p. 18)

Did you seriously just ask my Teacher if she ever wants to work in a "real" school? I think I deserve a skilled, well-trained Teacher just as much as the big kids do, don't you?
