SCRIPT-NC Webinar: STEM learning for each and every child
Presented by staff from the STEM Innovation for Inclusion in Early Education
November 10, 2020
References and Resources

General activities/assignments

Resources

1. SCRIPT-NC Website Resource search - Annotated collection of free, downloadable resources is searchable by topic, resource type, type of diversity, etc. (Note: you may select "STEM" to filter the STEM-related resources): <https://scriptnc.fpg.unc.edu/resource-search>
2. **Personas** are short snapshots of individual children, which provide information about the configuration of the child's family, offer insights about the child's likes or interests, and share information about the child as a learner. There are three sets of personas available: infant/ toddler, preschool, and K-Grade 3. The children reflect different learning needs: children who are dual language learners, have identified disabilities, live in challenging conditions, have experienced trauma, and are racially/ethnically/culturally diverse: <https://scriptnc.fpg.unc.edu/shifting-blackboards>

From STEMIE:

3. **STEMIE Mythbuster** series: <https://stem4ec.ning.com/blog/Mythbuster>
4. **STEMIEFest Media Cubbies** includes some great resources related to STEM developed by some of our amazing partners: <https://stemie.fpg.unc.edu/stemiefest> Resources that you might be interested in include:
 - a. **Joan Ganz Cooney Center's STEMIEFest Media Cubbie** includes blog posts and reports that advocate for, and make recommendations for early STEM learning for young children: <https://stemie.fpg.unc.edu/stemiefest/the-joan-ganz-cooney-center-at-sesame-workshop>
 - b. **Early EduAlliance and Cultivate Learning at the U of Washington** shared several resources on how educators can incorporate STEM in their daily plans and how to modify activities to increase children's engagement and learning: <https://stemie.fpg.unc.edu/stemiefest/early-edu-alliance>
 - c. **National Center for Early Childhood Teaching and Learning**: <https://stemie.fpg.unc.edu/stemiefest/ncecdtl>

Webinar Objectives

1

Participants will learn about the work of STEMIE

2

Participants will be able to understand why it is important for young children with and without disabilities to engage in STEM learning

3

Participants will be able to apply how to embed STEM learning into different courses.

Myths

- STEM is only for older students or gifted children, and it is too difficult for young children or children with disabilities to understand.
- Language and Literacy skills are more important than STEM knowledge and skills
- STEM learning is too expensive
- Children don't need adult guidance in play (or learning)

Agenda

- Overview of STEM Innovation for Inclusion in Early Education center (STEMIE): Who we are, why this work is important, what we do
- Examples of embedding STEM content into different college courses and inservice PD opportunities
- What's next for you from STEMIE:
 - New STEMIE resources
 - How you can continue to engage with our work so that we can support you!

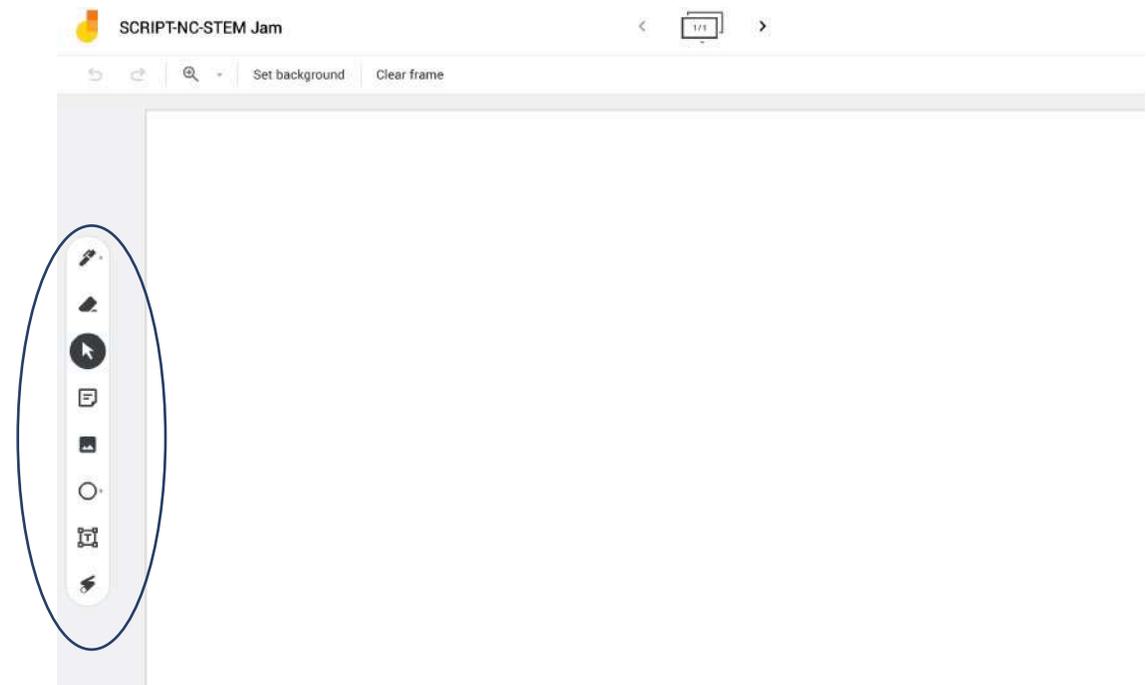

STEM Jam: How to?

Option 1: Type the link into your browser: <https://tinyurl.com/stem-jam>

Option 2: If you already have the Jamboard app on your phone, scan the QR code to get on Jamboard

Once in, begin adding comments, ideas and thoughts throughout the presentation

Quick Polls Via Zoom

- Comfort addressing early STEM content
- Incorporates STEM learning into coursework and practica/TA and inservice PD? What courses/PD opportunities (in chatbox)?
- Heard of STEMIE?

Center Outcome

Young children with disabilities participate and benefit from high quality STEM teaching and learning.

Why This Work is Important.

Do you wanna learn how to strum?

What We Do

Development of evidence including developmentally appropriate and evidence-based practices

Effective implementation of EBPs in STEM for children with disabilities

Provision of high quality PD and TA and collaboration with diverse stakeholders

Participation and engagement of young children with disabilities in STEM learning and experiences

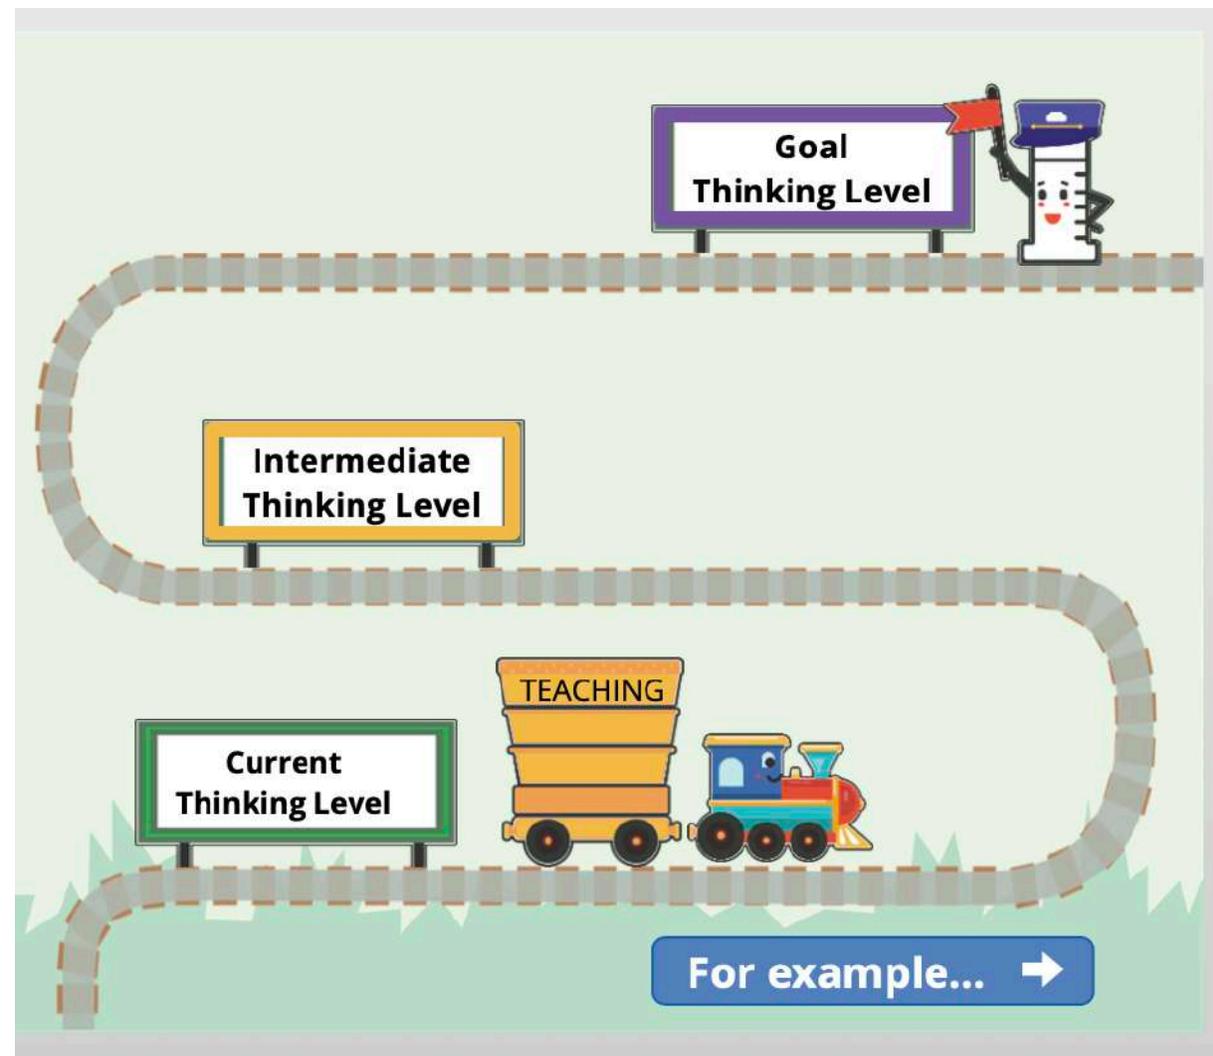

Learning trajectories

Goal: Where do you want your kids to go?

Developmental Progression: Where is the child now?

Instructional Strategies/Teaching: What can practitioners and caregivers do?

STEM INNOVATION FOR INCLUSION IN EARLY EDUCATION

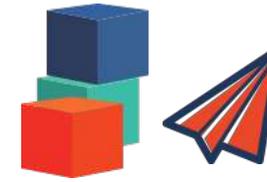

Inclusion in Learning Trajectories

Environment,
activities, and

**STEM can be incorporated
into different courses!**

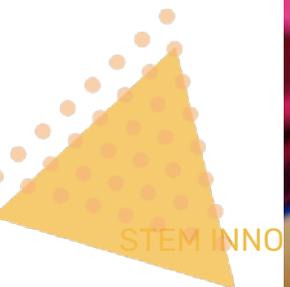

Child Development course

Shouldn't children be playing?
STEM seems too academic.

How do children learn?

STEM learning is appropriate for young children!

High quality STEM experiences:

Provide a context for implementing best practices for teaching and learning

Draw upon children's curiosity about how their world works

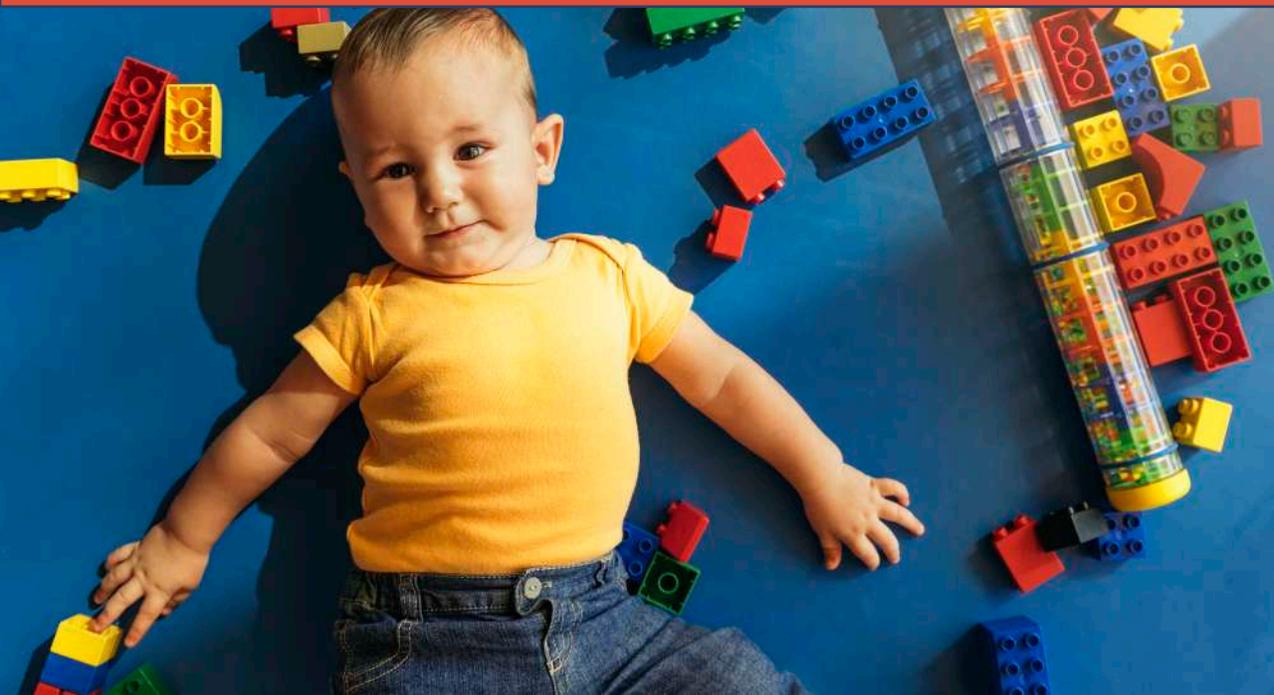

Encourage children to be engaged and motivated to learn

Involve a "hands-on/minds-on, goal-directed collaborative approach"

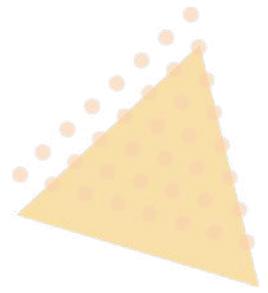

Promote higher-order thinking skills

Promote learning across multiple domains

Source: Greenfield, D. (2017)

What is your role in STEM learning?

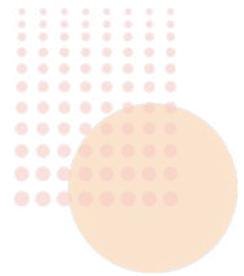

Children's role

- Piaget: Development occurs internally through children's active engagement with the world around them
- Vygotsky: "Zone of proximal development"

Adult's role

- Provide child with stimulating environment to explore
- Adults scaffold children into a "zone of proximal development"

1. Review Strategies to Support Young Children With and Without Disabilities in STEM

- (i) Review the microlesson on learning trajectories: <https://stemie.fpg.unc.edu/our-work/learning-trajectories>
- (ii) Review additional information about Ms. Amy's class and Shawntell:

Ms. Amy's class is a group of children from diverse backgrounds with varied interests. Many of the children are currently interested in Duplos and splashing about at the water table. Almost all the children love storytime. Shawntell enjoys playing with her brother, Ty at home, and the other children in the class. She can count up to five and knows the words related to quantity such as 'more, less, big, small'. She loves baby dolls and enjoys putting her baby dolls in the houses that her brother, Ty builds. She also enjoys splashing at the water table with other children, and at home, she enjoys taking baths, and 'helping' with washing up dishes. She does not speak in sentences and uses a communication board/visual cues to communicate and is working on turning pages in a board book and grasping objects.

- (i) Register for a free account <https://learningtrajectories.org>. Once you are in, select 'Explore Learning Trajectories'. If desired, you may select Alignment tool (on left side of screen, in green) to review the trajectories by age.
- (ii) Use the learning trajectories to identify Shawntell's current thinking level on counting and measurement (volume). Compare that to what some of Shawntell's 3-year old peers may be at.

Language and literacy course

How does reading storybooks support children's STEM development?

STEM-related books

- Small group discussion and share back
 - Do you have a favorite children's book that is STEM related?
 - Why is it a favorite?
 - What STEM topics/concepts are included in the book? For example:
 - The Very Hungry Caterpillar: number, counting, size

<https://eclkc.ohs.acf.hhs.gov/sites/default/files/pdf/s-team-ipdf.pdf>

Curated STEMIE Book List

STORYBOOK CONVERSATIONS WITH YOUR YOUNG CHILD

Recommended Books

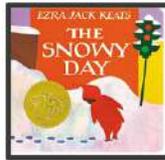

SCIENCE:

These award-winning books embrace every day science ideas accurately and have lots of engaging illustrations and photos to talk about with your young children. You may want to explore other books by the authors listed here – their other titles are often just as good!

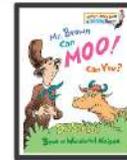

The ages are only SUGGESTED guidelines! For example, many books in the “babies and toddlers” category may be loved by older children. If you need to adapt the reading process to match the needs of your child, please see STEMIE’s adaptations resource: <https://stemie.fpg.unc.edu/dialogicreading-general-adaptations>.

Click on the images of the book covers to visit videos of an adult reading aloud each book. Check your local library for digital book lending or this free online digital library: <https://archive.org/>. You could also mute the audio from the read-aloud video if you prefer to read the book to your child yourself and do not have a copy.

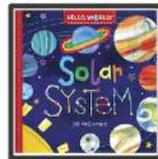

BABIES AND TODDLERS:

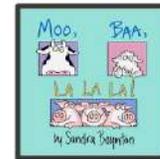

The Snowy Day
by Ezra Jack Keats

Mr. Brown Can Moo! Can You? Dr. Seuss's Book of Wonderful Noises
by Dr. Seuss

Hello World! Solar System
by Jill McDonald

Moo Baa La La La
by Sandra Boynton

The reproduction of this document is encouraged. Permission to copy is not required. If modified or used in another format, please cite original source. Suggestions for adaptations to the reading process

WHAT ADULTS CAN DO?

STORYBOOK CONVERSATIONS WITH YOUR YOUNG CHILD

Dialogic Reading Guide

STEAMIE INNOVATION FOR INCLUSION IN EARLY EDUCATION

Are you spending more time at home reading with your young child(ren)? Are you interested in helping your child(ren) gain language skills and learn about STEM?

Use this reading time as an opportunity for building concepts through conversations! Your child can help you tell part of the story. You can use digital books on screen or with regular paper or board books. This is called *dialogic reading*.¹ It is easy! And we have some tips to help you do it!

¹What Works Clearinghouse Intervention: Dialogic Reading
https://ies.ed.gov/ncee/wwc/Docs/interventionReports/WWC_Dialogic_Reading_020807.pdf

The Very Hungry Caterpillar is a book written by Eric Carle.

STEP ONE
 You and your child select a book. Look for a book that appeals to your child and has lots of detailed pictures to give you things to talk about. Encourage your child to turn the pages or operate the screen. Let's use *The Very Hungry Caterpillar* by Eric Carle as an example.

- ✓ For tips on picking appropriate books, [see this guide](#).
- ✓ If you don't have a paper copy of the book, [click here to view a digital version](#).

STEP TWO
PEER: Prompt, Evaluate, Expand, & Repeat

P: Prompt your child with questions. Use the acronym **CROWD** to remember ways to prompt your child. Examples on the left.

E: Evaluate your child's answers by responding to what the child said. Praise and encourage. "Yes, you're right! This book is about a hungry caterpillar."

E: Expand your child's answers. Ask another question or help the child remember additional related details. "Where did we see a caterpillar yesterday?"

R: Repeat. Repeat or revisit the prompt you started with, encouraging your child to use any new information or words you've provided. "Can you say caterpillar?"

- ✓ **Recall** and **Distancing** work best with older preschoolers.

Prompt Examples:

C Complete a sentence
 "This book is called 'The Very Hungry _____'."

R Recall
 "What happens to the caterpillar at the end of the story?"

O Open-ended questions
 "Tell me what is happening in this picture."

WH questions
 "Why do you think the caterpillar needed so much food?" "What is the caterpillar going to eat next?"

D Distancing questions
 "How would you feel if you ate what the caterpillar ate?"

STORYBOOK CONVERSATIONS WITH YOUR YOUNG CHILD

General Adaptations

STEAMIE INNOVATION FOR INCLUSION IN EARLY EDUCATION

SUPPORT CHILDREN WHO ARE LEARNING TO MANIPULATE:

PAGE TURNERS

Image credit: Tots-n-Tech

Use things around you house, such as small pieces of felt, popsicle sticks, empty daily contact lens cups, or big paper clips to place on sides of book pages.

Learn more:
[Easy Picture Adaptations](#)

This adaptation can also...

- ✓ Increase children's attention and engagement
- ✓ Support alternative ways of communication
- ✓ Support children's learning

STORYBOOK CONVERSATIONS WITH YOUR YOUNG CHILD

STEM Building Activities

STEAMIE INNOVATION FOR INCLUSION IN EARLY EDUCATION

Patterns:
 Take a walk around the neighborhood and talk about the patterns you see in the cars, plants, clouds, and buildings.

Make patterns out of blocks, crayons, or even snack items as you play (or eat)! Encourage your child to replicate patterns you make and then switch and let your child start the pattern.

Discuss patterns on your clothing as you're getting dressed in the morning. "Oh, I see you have on a blue and white BUTTERFLY patterned shirt this morning." Or "You're looking at the blue and white STRIPES on Daddy's pajamas."

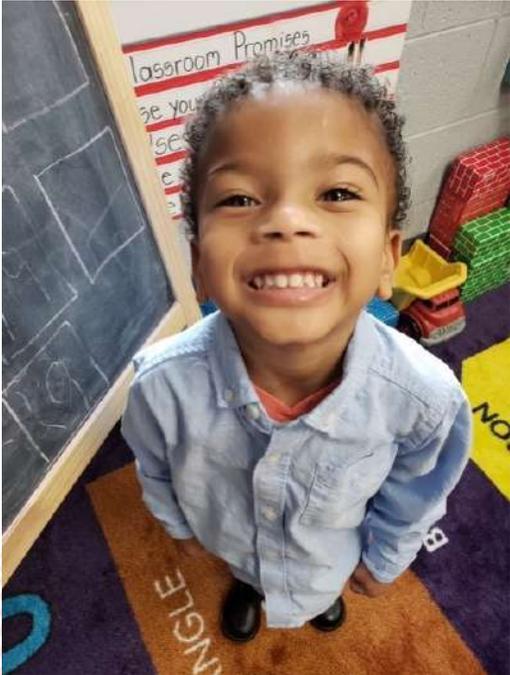

STEMIE INNOVATION FOR INCLUSION IN EARLY EDUCATION

Use of Personas

Winston

- Winston is very strong in learning about dinosaurs and incorporating “his favorite” T-Rex in his learning and social environment.
- His mother is a strong advocate for literacy by which books are read to him daily. Winston has evolved in his reading by identifying objects, some words, and talking about the images he sees in the books. The concern his parents have is finding images in books that look like him.
- Winston’s parents are concerned that he does not speak as clearly about other concepts outside of dinosaurs and nature.
- He is well versed in the alphabets, numbers to twenty, colors, shapes, opposites and some aspects of the earth such as differences in night and day, cold and hot.

Activity/Assignment

- Read the personas
- Select STEM-related books
- List STEM topics/concepts
- Plan dialogic reading strategies
 - Small group discussion and share back
 - Padlet/google doc/Jamboard
 - Flipgrid

<https://connectmodules.dec-sped.org/wp-content/uploads/2019/04/DECHandout-6-3.pdf>

Handout 6.3

CROWD Strategy Planning Sheet

Title:

Author:

Illustrator:

Create at least 2 prompts for each category for your book that you can use to prompt and build upon children's language during dialogic reading. Include the page number that corresponds to the appropriate opportunity to use each prompt.

Completion- The reader creates an incomplete sentence to prompt the children to come up with the appropriate response (i.e. fill-in-the-blank). (Ex: Lily's purse is _____ and she brings it _____).

Recall- The reader asks a question designed to help children remember key elements of the story. (Ex: What happened when Jose went back to school? What was missing from Corduroy's overalls? How did Stephanie wear her hair?)

Open-ended- The reader asks a question or makes a statement that requires children to describe part of the story in their own words beyond just a "yes" or "no" response. (Ex: Tell me what you think is happening in this picture. How is Josie going to carry all of those apples?)

Wh-questions- The reader asks a question about the story that begins with what, where, who, or why. (Ex: What do you think shy means? What does it mean to be embarrassed?)

Distancing- The reader helps children make connections between events that happen in the story to those that occur in their own lives. (Ex: Tell me about a time when you felt lost or you lost something. How did you feel when your friend moved away?)

For example, adding information,
reducing steps

Scenario to consider:

Ms. Amy is a preschool teacher in a community childcare program. She works hard at ensuring children have school readiness skills by the time they leave her program. She offers a lot of opportunity for free play but also provides some teacher-directed activities such as storybook reading. She provides free play activities such as housekeeping, blocks, and a water table. Her director wants her to incorporate STEM into the curriculum but Ms. Amy doesn't know how. She and her assistant teacher, Ms. Li have a class of twenty children, including three-year old Shawntell, a joyful and curious child who has Down syndrome. Shawntell's parents, and older brother Ty are always eager to learn how they can support her to achieve her full potential. Her older brother Ty for example loves science and building, and the family told Ms. Amy that Shawntell is always interested in what he is doing.

Shawntell attends Ms. Amy's class each day, where she receives her services. Delays have been identified in all domains of development. Her speech- language pathologist is working with Ms. Amy, and family to support Shawntell's early speech and language development.

STEM in the classroom: Using a tactile book

Ed. Technology course

What about Computational Thinking?

Why Computational Thinking?

- Technology use increasing
- CT foundational skills prepare learners for life
- Links to success in academics
- Problem solving critical skill

Committee on STEM Education, 2018

What is Computational Thinking?

“a set of processes that defines a problem, breaks it down into components, and develops models to solve the problem, then evaluates the result, iterates changes, and does it again” (Committee on STEM Education, 2018)

- Sequencing
- Repetition/looping
- Abstractions/conditionals
- Decomposition
- Debugging

Clements et al. (In preparation)

Daily activities

- Cooking
- Reading
- Building
- Maps
- Dressing
- Transitions

Ice Cream Cone Algorithm

Alaina

Alaina is a 4-year-old girl who lives with her mom, dad, and little brother. Alaina was born with bilateral, sensorineural, severe-profound hearing loss. This means she is deaf in both ears. At the age of 10 months, Alaina received cochlear implants which enable her to hear. Alaina and her parents were enrolled in their state's Early Intervention program from the time she was born to the age of three. Now Alaina receives early childhood special education services in an inclusive classroom with her peers. Her inclusion is supported through services she and her teacher receive from a Teacher of the Deaf/Hard of Hearing (TOD) and a Speech-Language Pathologist (SLP).

Alaina loves to play and is very social with her peers. She plays with all the children in her classes but also has special friends who she prefers. Her interests include play-doh, baby dolls, playing chase games outside, and anything pink! Alaina

is interested in books and has the attention to listen to long stories but sometimes has a hard time remembering all the details.

Often, because Alaina is very socially competent, it can be difficult to notice when Alaina is struggling in the daily classroom routines. She is able to follow other children's lead when she doesn't hear the directions or can't understand what is being said. Sometimes Alaina struggles to follow step by step instructions. Alaina's expressive language is very good but she sometimes is missing the beginnings or ends of words – especially softer sounds. In addition, it is difficult for Alaina to learn new words quickly.

Child Activity Matrix

Child: _____ Teacher: mom Date: _____

Learning Goals

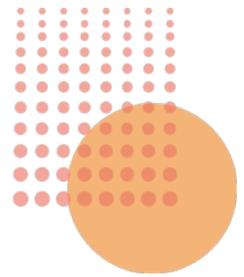

1. **Child will recognize and create patterns and explain how a symbol can stand for something else**
2. **Child will put steps together in the correct order to carry out a task**

Daily Schedule	Learning Activities Addressing Goal #1	Learning Activities Addressing Goal #2
Playtime	<ul style="list-style-type: none"> • Designate blocks or familiar objects to stand for simple movements, sounds, or actions. • Develop "codebook" or simple means to remember designations • Put together blocks or objects to carry out a sequence 	<ul style="list-style-type: none"> • Discuss simple first then activities in play • Talk about the order of things as you play • Encourage child to explain steps of common play activities or pretend play scenarios
Meal and snack time	<ul style="list-style-type: none"> • Talk about differences and similarities in foods and snacks • Create patterns and sequences with foods such as fruit loops... • Make choices about what to eat in what order 	<ul style="list-style-type: none"> • Explain how to follow steps to "cook" something • Ask the child to help develop step-by-step cooking activities to make a favorite food (i.e. sandwich, bowl of cereal with milk, ice cream cone) • Follow "recipes" with measurements and mixing steps together
Outings & transitions	<ul style="list-style-type: none"> • While out in the community, point the child to recognize patterns • Ask child if they can find any sequences or patterns • Talk about simple symbols and signs in the environment 	<ul style="list-style-type: none"> • Explain steps needed in order to transition to leaving the house for an outing • Facilitate creation of first-then activities involved in outings and transitions

Video Example

(Insert Toni's Video here)

Let's Reframe It!

Statement	Reframe
I can't teach STEM because I am really bad at math and science	
Infants and toddlers are too young to learn STEM	
Children with disabilities are not able to do STEM activities	
Literacy is entirely separate from STEM	
Computational thinking concepts are too advanced for young children	
Girls don't like STEM

Using Technology to Build and Sustain Relationships with Students, Children, and Families Tuesday, March 2, 2021, 2:00 – 3:30 PM EST

Many programs have shifted to hybrid or online teaching models for the foreseeable future. This presents unique opportunities for fostering relationships and building community that are different from those in the face-to-face classroom. Similarly, students need a new repertoire of tools and strategies for building meaningful connections with both children and families. This session will provide strategies for supporting three technology-assisted capabilities: 1) organizing online classes; 2) cultivating instructor-student and student-student relationships; and 3) preparing students to use technology effectively to support children and engage families. Strategies suitable for both synchronous and asynchronous environments will be shared. Presenter: Danielle Savory Seggerson (Lansing Community College, Michigan)

Explicit and Intentional: Building Emphasis on Culture, Race, and Equity into Early Childhood College Courses Tuesday, April 20, 2021 2:00 – 3:00 PM EST

Explicit emphasis related to supporting the full and equitable potential of children who are diverse in terms of culture, race, language, ability, opportunity, and life circumstances is now called for by national publications, standards, competencies, and position statements. The challenge for early childhood instructors is how to authentically and intentionally infuse new evidence and practices in courses and field experiences. This session will highlight effective strategies for taking action to address culture, race, and equity as part of activities, experiences, and assignments.

Presenters: Cathy Collie-Robinson and Marye Vance (Durham Technical Community College, North Carolina) and the SCRIPT-NC team
